

Lu Dinh Dung

Fullstack Developer

📞 0985083177 ✉️ dungdung23092002@gmail.com 📅 23/09/2002
📍 TP Hồ Chí Minh 🌐 ludinhdung-portfolio.vercel.app

I am passionate about programming and seeking a Fullstack role to learn, grow, and contribute effectively.

◆ EDUCATION

- ◆ 10/2020 - 05/2025 **FPT University**
Bachelor - Software Engineering
3 times Honorable Student Of Semester.

◆ WORK EXPERIENCE

- ◆ 08/2024 - 03/2025 **Full Stack Developer**
Digital Fortress
 - **Tech Stack:** Node.js, Express, React, PostgreSQL.
 - Implemented new features on both the frontend and backend based on business requirements.
 - Performed manual testing and logged bugs using Jira.
 - Designed and updated database schemas to support new functionalities.
 - Contributed to system architecture design, including database modeling and RESTful API specifications.
- ◆ 08/2023 - 01/2024 **Java Developer Intern**
FPT Software
 - **Tech Stack:** Java (Spring Framework), React, MariaDB.
 - Designed and implemented reusable UI components to ensure UI consistency and improve development efficiency.
 - Implemented various features across frontend and backend to meet business requirements.

◆ SKILL

- ◆ Technical
 - CSS (1 year) Docker (1 year) Express (1 year) Git (1 year) HTML (1 year)
 - Java (1 year) JavaScript (1 year) MySQL (1 year) ReactJS (1 year)
 - Spring Boot (1 year) Unit test (1 year) NoSQL (< 1 year)
- ◆ Soft Skills
 - Team player in cross-functional teams.
 - Committed to continuous learning.
 - Adaptable to new technologies and changes.
 - Strong problem solver and creative thinker.
 - Effective communicator.
 - Teamwork and collaboration in cross-functional environments.

◆ HIGHLIGHT PROJECT

◆ 01/2025 - 04/2025

Grade-Stack (Programming Learning Platform)

Project URL: <https://github.com/ludinhdung/programming-learning>

- **Description:** Online learning programming platform.
- **Responsibilities:**
 - Designed and developed interactive coding modules for users to learn programming languages such as Python, JavaScript, and Java.
 - Set up and maintained a scalable backend infrastructure.
 - Integrated real-time code execution using Docker sandbox environments for instant feedback.
- **Tech stack:** Express, React, PostgreSQL, Docker, Microsoft Azure.

◆ 11/2023 - 01/2024

Stack Overflow Clone

Project URL: <https://github.com/ludinhdung/stack-over-flow-back-end>

- **Description:** Stack Overflow Back-end.
- **Responsibilities:**
 - Designed RESTful APIs for Q&A and voting.
 - Integrated Spring Security with JWT for authentication.
 - Dockerized for deployment and scalability.
 - Managed continuous integration for automated testing and deployment.
 - Utilized Git for version control in collaborative development.
- **Tech stack:** Spring Boot (RESTFul API), Spring Data JPA (ORM), Security (JWT), Unit Test (Mockito, JUnit5, Test Container), Monitoring (Actuator), MySQL, Docker, CI Pipeline, Git.
